COMPONENT, ESPECIALLY FOR A MICRO-
PROCESSOR

COMMUNICATION

This Communication is in response to applicant's "Response to Communication Mailed February 26, 2007" filed 21 March 2007 in the United States Patent and Trademark Office (USPTO).

BACKGROUND

On 26 February 2007, applicant was mailed a communication indicating that the declaration filed 21 November 2006 was defective as the title of the application was written in German and had not been translated. Applicant was afforded one month to file a response.

On 21 March 2007, applicant filed the present response.

DISCUSSION

Applicant has presently provided an English translation of the title which appears in the declaration. Further, applicant has attested that the translation is an accurate English translation of the title of the invention which appears on the enclosed declaration. Thus, applicant has satisfied the provisions of 37 C.F.R. 1.69(b) and all of the 35 U.S.C. 371 requirements have now been satisfied. Regarding applicant's statement as to the originally filed declaration complying with 37 CFR 1.69(b), while it is true that applicant used a form provided by the USPTO, the text of the title was added; thus this text was not part of the original form and thus the Office needed an English translation.

CONCLUSION

This application will be given an international application filing date of 28 June 2004 and a date of **21 March 2007** under 35 U.S.C. 371(c)(1), (c)(2) and (c)(4).

This application is being returned to the DO/EO/US for processing in accordance with this decision.
